Background Information for Science Fair Project

A	Article Title Website URL/Book Author and Date Published	B	Article Title Website URL/Book Author and Date Published
B	Describe		
C	relate		
D	help		
E	DICK		

* Students should be looking for information that tells them the science behind the variables they have chosen for their projects. For example, if a student's project is testing different makeup removers. They will want to research the ingredients in makeup that make it difficult to come off using a solution such as water. The student should also know the different ingredients in the makeup remover, specifically the ones that will remove the makeup.

Gather info. Now for bibliography
